

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

The most important features which characterize the books of this series are the following: words are presented at the same time in columns and in use; they are used not in dry, isolated sentences, but in sentences naturally connected in describing the manifold interests, occupations, and experiences of childhood, in telling children's classic stories, in biographies of great men, in describing historical events, in explaining the chief features of the government of city, state, and nation. All this matter is carefully graded both in respect to the words and the thought, and is presented in a way to interest and instruct. The pupil is conscious of the meaning and the use of the word as he learns to spell it. If the context does not make the meaning of a word clear to a pupil, it does enable him to use his dictionary intelligently in getting the meaning of the word.

By means of this method of presentation words are reviewed, many of the more difficult ones repeatedly. This review is not a mere mechanical repetition of the isolated word; each time the word recurs it is in use. This is the most effective kind of review. At the same time the meaning of the word is becoming, for the child, broader, fuller, and more clearly defined.

Throughout the series words in columns are separated into syllables and the primary accent marked. All words in use appear in their usual form. Webster has been followed in spelling, pronunciation, syllabication, marking (which appears only in the list of foreign words in Book VII), and accent.

NOTE TO TEACHERS

The use of each word in the columns is illustrated by a sentence containing the word.

Every other word in the sentence, with the exception of a few very easy words, has been used in the same or in a preceding book as a column word.

Therefore every sentence is a review of words already taught.

The more difficult words are reviewed many times.

SUGGESTION

When the books are used for the first time many of the review words of which the sentences are composed may not be familiar to the pupils; on this account the lessons may seem somewhat difficult.

Hence it is suggested that for the first year the books be placed as follows :

IN SYSTEMS OF EIGHT GRADES

Book I in Grade 2
Book II in Grade 3
Book II in Grade 4
Book III in Grade 5
Book IV in Grade 6
Book V in Grade 7
Book VI in Grade 8

IN SYSTEMS OF NINE GRADES

Book I in Grade 3
Book II in Grade 4
Book II in Grade 5
Book III in Grade 6
Book IV in Grade 7
Book V in Grade 8
Book VI in Grade 9

After the books have been used for a year the grading may be arranged as desired, concluding with Book VII in grade 8 or grade 9.

RULES FOR SPELLING

RULE I. Silent *e* at the end of a word is dropped when *ing* is added.

Illustrations

close + ing = closing

amuse + ing = amusing

cure + ing = curing

excuse + ing = excusing

Exceptions : shoeing, singeing, tingeing, hoeing, dyeing

RULE II. A final consonant following a single vowel is doubled before an ending beginning with a vowel :

1. In words of one syllable.

2. In words of more than one syllable when the accent is on the last syllable.

Illustrations

rob + ed = robbed

commit + ing = committing

ship + ing = shipping

prefer + ed = preferred

RULE III. Final *y* following a consonant is changed to *i* before an ending that does not begin with *i*.

Illustrations

deny + es = denies

pity + able = pitiable

fancy + ed = fancied

happy + ness = happiness

NOTE. Adjectives of one syllable usually retain the *y* in derivatives, but the forms *drier* and *driest* are used. *Babyhood* is an exception to the rule.
